An analytical web developer seeking challenging opportunities that foster growth and creativity.

Projects

- Currently in the early stages of collaborating on a beginner's guide to web development. I personally created a team consisting of designers (UX and UI) and two additional full stack developers. An intuitive and creative UI will be implemented with React and Bootstrap..
- A REST API for movie lovers to create a profile and acquire information about their favorite movies. I used React, Node.js, MongoDB, Bootstrap, and Axios to provide users with a modern UI that works on every device. User authentication is provided by JWT, and CORs gives users peace of mind that their information is safe when looking up who directed Fight Club.
- A Meetup PWA built using React. Data visualizations display upcoming events and registration availability. Client side created with libraries such as Moment, Recharts, and Axios.

Experience

Web Developer / Integrative App Solutions, LLC

October 2020 - October 2020

- Developed a billing solution for a web application by integrating Stripe Checkout and Firebase in a full-stack application built with React and Node.js.

Education & Training

CareerFoundry / Full Stack Immersion

April 2020 - August 2020

- Completed the seven-month immersion course in four months

Skills & Technologies

- | | |
|-------------|---------------------|
| • React | • CSS |
| • Stripe | • Javascript |
| • Firebase | • (React) Bootstrap |
| • Firestore | • Axios / Fetch API |
| • Node.js | • Troubleshooting |
| • HTML | • Teamwork |
